SPECIAL

WHOLESALE PRICE LIST

SPRING

1935

Gentlemen: You will remember I hought quite a number of peach trees from you last year. Also plau and pear trees. First, I want to say that they've all done very nicely. I don't believe that a single tree of the one hundred and fifty which I bought died.

Yorus very truly, Dr. A. J. Shadmau

EVERGREENS

Space will not allow us to enumerate the varieties and sizes which we can furnish, but a special descriptive list of sizes and prices will be mailed upon request.

PEONIES

White, pink or red. \$.35 each, 3 for \$1.00. We offer over 50 named varieties at varying prices. Special peony list on tequest.

ROSE BUSHES

We handle only the best two year plants. They are not to be compared with department store "so called bargains".

CLIMBING ROSES - 40c Each

American Pillar. Single, rosy-pink, large flowers. Climbing American Beauty. Red. Dr. Van Fleet. Flesh pink. Dorothy Perkins. Pink.

Dorothy Perkins. Pink. Excelsa. Crimson red. Mary Wallace. Salmon pink. Paul's Scarlet. Scarlet. Silver Moon. Pure white, Yellow stamens. White Dorothy Perkins. White. Primrose. A new hardy, yellow climber with large double, canary yellow flowers in great profusion. Scorcher. Very vigorous, and hardy, with handsome vermilion flowers, cover-ing the plant in great profusion and a fair repetition in Autumn.

HYBRID PERPETUALS (HARDY) - 50c Each

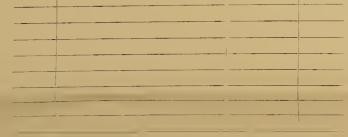

American Beauty. Red. General Jacqueminot. Red. Frau Karl Druschki. Pure white. Paul Neyron. Pink, very large.

Aashaway, Rhode Island, May 2. 1934

Dear Sirs The apple trees and pear trees arrived last month in avonderful condition and we expect to set more of your trees next year. Yours truly, Reginald Kenyon

TEA ROSES (EVERBLOOMING) - 50c each except as noted.

TEA ROSES (EVERBLOOMING) — 50c each except as noted.
Columbia. Vivid pink.
Duchess of Wellington. Intense saffron-yellow, stained rich crimson.
Francis Scott Key. Brilliant crimson.
K. A. Victoria. Pure white. Very fine form.
Mme. Butterfly. Bright pink. apricot and gold.
Mrs. Charles Bell. Salmon, turning to pearly pink.
Mme. Edouard Herriot. Coral red, shaded yellow and scarlet.
Mrs. Aaron Ward. Yellow, sometimes shaded salmon and rose.
Pink Radiance. Carmine pink, yellow at base of petals.
Red Radiance. Dazzling, crimson scarlet.
Souv. de Claudius Pernet. Sunflower yellow.
President Herbert Hoover. Marcon, orange and gold. long pointed buds, rigid stems, and continuous bloomer.
Talisman. Orange red, golden yellow and copper red.
Charles K. Douglas. A very fine, bright red with scarlet undertone.
Betty Uprichard. Brilliant, copper red buds and semi-double. salmon pink flowers stained with copper pink on ustide.
E. G. Hill. Large blossoms of deep marcon. velvety inside, glistening outside. Very fragrant.

Please give names and addresses of a few friends who are interested in Fruit growing we will be glad to add enough stock to your order to pay for your kindness.

Jewett City, Conn., April 12, 1934

Gentlemen: All I want this year is the small order inclosed but be assured that whenever I buy trees it will be from you. It's impossible for me to describe the difference between your trees and those I brought from other nurseries before I knew about your nursery. Last year I must have picked a bushel of pears on a three year old tree—Beurre Bosc. Yours very truly, David Berton

side. Very fragrant. Etoile de Hollande. Dark, velvety crimson. Brilliant satiny pink, shaded with Mrs. E. P. Thom. Fine long buds open into rich lemon-yellow hloom.

Spring Valley, New Yark, May 9, 1934

Gentlemen: We now have about 1.500 trees bought from you since Spring 1925 in bearing. All true to name. So here is one satisfied customer. Yours very truly, Beyer Brothers

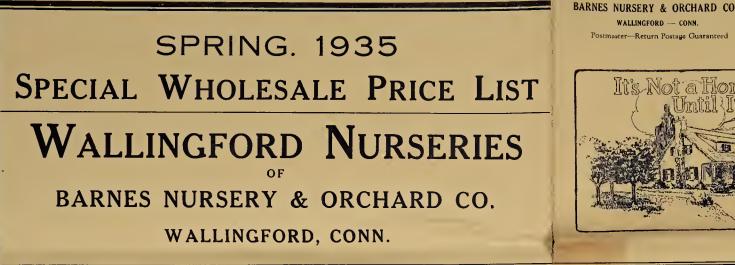

SOME NEWER VARIETIES

- Blaze. (U.S. Plant Patent No. 10.) Sometimes called Everblooming Paul's Scarlet, Similar to this variety but continues to bloom all season until hard frost, \$1.50 Each.
- Golden Climber. (Mrs. Arthur Curtis Jones.) (U. S. Plant Patent No. 28.) A very hardy new yellow climber. Blooms over a long period even in late summer and fall. Semi-double blooms of pure gold on 15 to 18 inch stems.

- summer and fall. Semi-double blooms of pure gold on 15 to 18 inch stems.
 \$200 Each.
 New Dawn. (U. S. Plant Patent No. 1.) Vigorous free bloomer. Flowers similar to Dr. Van Fleet. \$1.50 Each.
 Countess Vandal. (U. S. Plant Patent No. 38.) Long. pointed bud, coppery bronze, suffused with soft gold. \$1.00 Each.
 Nigrette. (U. S. Plant Patent No. \$7.) The darkest of roses, appearing almost black from a little distance. Intensely deep maroon with blackish velvety sheen and deliciously fragrant. \$2.00 Each.
 Souvenir. (U. S. Plant Patent No. 25) Sometimes called Golden Talisman. Deep golden yellow blooms with Talisman characteristics. A most excellent variety. \$1.00 Each.

New Haven, Conn., October 31, 1934

I was very much pleased with the grape vines and raspberry bushes you sent to me. Yours truly, Winfield S. Manship

Please do not confuse us

We have no connection with any other "Barnes" company. Members of our company are:

> Norman H. Barnes James P. Barnes

TO OUR FRIENDS

We wish to thank our customers for their business given to us during the past year. During the past five or more lean years, when the public in general have been fighting for an existence, we have been able to carry on. and although our production has been less, we have always looked for quality and reliability in our stock and what we are offering this year is no excep-tion, whether fruit trees or ornamental nursery stock.

There is a very decided shortage of fruit trees in the country, due both to drought in many sections, and to the fact that many nursery men either have been forced out of business or at least have greatly curtailed their production. Therefore, without any hesitation we suggest that if ever it is necessary to order early, it is **NOW** and for the next two years. The shortage will not reach its peak for at least two years more. Once more, **ORDER EARLY** and have the stock reserved until you wish to have it shipped in the spring. he spring.

STATEMENT OF INSPECTION

Amherst, Mass. October 8, 1934

TO WHOM IT MAY CONCERN:

Gentlemen.

This is to state that I have examined for trueness to name all the saleable apple stock of Wallingford Nurseries of Wallingford, Connecticut now grow-ing near Wallingford, Connecticut and as the trees now stand in the nursery row, all tress are, to the best of my knowledge and belief, true to name. J. K. Shaw,

Research Professor of Pomology

NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original sell-ing price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers.

APPLICATION OF PRICES

Customers may select 5 of any kind (such as 5 peach) at the 10 rate, 50 at the 100 rate, 500 at the 1000 rate.

DISCOUNT

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

SIZE OF TREES

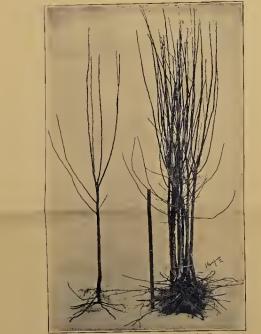

Caliper or diameter governs the size of all fruit trees except 1 year apple. Height is only approximate.

Holliston, Mass., February 2, 1934

nteener: We have been buying trees from you for the past three years. We are sory that we did start buying back in 1925 when we started developing our orchards here, for you cer-nly five up to your local reputation for fair and square dealing. We shall certainly buy your trees in the future. You surely have used us O. K. Gratefully yours, Crestmere Farm, J. W. Hulbert, Supt.

STANDARD APPLE TREES ORDER EARLY

Permanent apple trees are usually planted about 40 feet apart. Some growers prefer more, some a little less. Some also use fillers, such as peach trees, or early bearing varieties of apples making them 20 feet apart or if planted only in the center of the 40 foot space the distance will be 28 feet. As the trees begin to crowd, taking out one half will leave them 28 feet apart and later when the remaining fillers are removed, the distance will be 40 feet. Thus an income can be had for many years, when the permanent trees will need only a portion of the land.

	A.A		

Exceptions: Dwarf Baldwin, Dwarf McIntosh, Dwarf Cortland 18 in. cal. 10c. e. Standard McIntosh and Red Strain Delicious, one year only at 10c each extra

*†Baldwin. Large, red, winter apple. Known by all. The only one of the older varieties which the 1925 New England survey showed would not ex-ceed 1925 production in 1935. *†Cortland. Very similar to McIntosh in flavor. Larger, darker red, ripens two weeks later, hangs to tree better, and well worth planting. Red Strain Delicious. A so-called "Blood Red" strain of Delicious. It colors early and should by all means be planted in preference to common Delicious.

Duchess. Striped red. Early August. Following Red Astrachan.
 Early McIntosh. A cross between McIntosh and Yellow Transparent.
 Originated at Geneva Esperiment Station, New York. The fruit is very similar to McIntosh in all respects, rhy ning after Yellow Transparent. Tree is a good thrifty grower and bears annually.
 Fall Pippin. Well known Fall variety.
 Collis Beauty. (Bed Rome Beauty). Generally considered to be the

Fall Pippin. Well known Fall variety.
Gallia Beauty (Red Rome Beauty). Generally considered to be the best red strain of Rome Beauty, an early and annual bearer of late winter apples which retain a bright, shiny appearance until spring.
*†Gravenstein. Large, striped, red. Red Gravenstein. (Washington Strain) Originated in the State of Washington—said to be the very best strain of Red Gravenstein, similar to Gravenstein, but a nuch darker red. Macoun. (Description by New York Fruit Testing Association. Geneva, New York.)
"Just as Early McIntosh advances the strain of the state of the sta

Macoun. (Description by New York Fruit Testing Association. Geneva, New York.)
 "Just as Early McIntosh advances the season for the McIntosh type of apple. Macoun produces a late crop of these red-skinned, white-fleshed, richly flavored, aromatic apples. The season of Macoun is from one to two months later than that of McIntosh with Cortland midway between. In shape, the fruits of Macoun are similar to those of McIntosh; the color is a darker red, less striped, and with a heavier bloom; the flesh is much the same in color, texture, flavor and aroma. The trees bear regularly and heavily This promises to be an apple of great merit coming in, as it does, long after all other McIntosh—like apples are out of season."
 * McIntosh. Known by everyone. Season of picking, last of September. Melba. One of the newer varieties. Similer to Duchess in season and markings, but better quality and larger.
 Milton. (Description by New York Fruit Testing Association. Geneva. New York.)

Milton. (Description by New York Fruit Testing Association. Geneva. New York.) "Milton is a sister of Early McIntosh which ripens its crop a month later. Its main value is that it is a McIntosh type which ripens before McIntosh. The tree is vigorous but not as large as that of Early McIntosh. The fruits are covered with a very pinkish red and heavy bloom. The flesh is white, tender, crisp, juicy. and of McIntosh flavor and aroma." *Northern Sp. Vell known early Winter, red variety. Opalescent. Very large, red apple. Fall. Red Astrachan. Best, early red apple. August 1st. Red Rome Beauty. See Gallia Beanty. Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

Your trees have always been very satisfactory, and I trust that this lot will be up to your usual standard. Yours truly, Nathan Smith

PEACH TREES

PEACH TREESOur observation has been that the planting and prices of peaches (fruit)
fluctuates in about 10 year cycles. There was heavy planting of peaches
previous to 1925 which has been reflected in lower prices in the fruit since
1925. With little planting the past few years, and the very heavy cutting
out of old orchards following the severe weather of the winter of 1934, our
belief is that the production of peaches in the North Eastern part of the
United States is now so much below normal, that those who plant now will
produce on the up cycle of prices over the next ten years.
For Spring 1935, we offer peach trees, just as usually offered, that is
one year tops and two year roots, also a lot with one year tops and three
year roots. We ran the tree digger under this latter block in the Spring of
1934, thus cutting the roots, which has given an unusually nice lot of fbrous
roots. The only difference in appearance of these two lots of trees is that
those which have three year roots have somewhat larger butts and root
systems. We show photos of both lots of trees. Peach tree production next
year will be very short. Plant Spring of 1935, save money on trees and be
ready to take advantage of the higher prices of fruit which is most certainly
coming.

South Haven. August 25th. A very large yellow freestone of Michigan in. Tree is thrifty and productive. origin.

WASHINGTON, D. C.

Belle of Georgia. September 1st. Probably the best known and most popular of white varieties.

Elberta. September 4th. Known to all. King of Peaches

То

J. H. Hale. September 8th. Its extra large size, rich golden yellow color and handsome red check, fine flavor, and general attractiveness place it in a class by itself. For several years, Hale on our roadside stand have brought from 100 to 150% more than our best Elbertas.

Brackett. Very similar to Elberta, following immediately after this popular variety.

Lizzie. September 20th. Best of its season. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwise similar. This variety and Brackett fill a season which has been badly neglected the past few years, and come at a time when peaches have been selling at about 100% more than earlier old time varieties.

At about 100% more than earlier old time varieties. **Peach Special No. 1.** For those wishing a yellow freestone peach with handsome red coloring and shape of Elberta to follow immediately after Golden Jubilee, we offer Special No. 1. The original tree is a seedling stand-ing in sod uncared for, but its production has been such that we have pro-pagated from it, planted in our own orchards and have a few for sale. We have not attempted to introduce the variety nor to give it a name, so when ordering, please specify Peach Special No. 1.

Comparative sizes of our fs, Ts and fs Peach Trees. 2 year roots

Monmouth, Maine, April 18, 1934

I set a few of your trees three years ago. They had a wonderful opportunity and they took advantage of it. Gentlemon: Respectfully yours, George Frost

WALLINGFORD --- CONN.

It's Not a Home

Until (It's Planted

Two year old He in. and up Baldwin Trees.

For home planters who wish an unusually large tree, we offer seven year old, twice transplanted trees in the varieties designated. These two trans-plantings have made possible a wonderful root system so that the trees may be transplanted just as safely as small trees. There is now a very acute shortage of fruit trees in the country, probably more so than has existed for the past thirteen years. Our opinion is that this shortage will not reach its peak for two years more. If it ever is neces-sary to **order early**, it is now. **Don't delay**.

TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Sunbeam. August 1st. Medium size, fine flavor, white with red check. We **Sumpean.** August 1st. Areaning size, the dayor, white with red check r a very limited quantity in $\frac{1}{16}$ and $\frac{1}{16}$ only. **Greensboro.** August 1st. Medium size. White flesh. Very productive.

Mikado. (June Elberta) Angust 1st. A very handsome roundish variety. flesh-excellent quality.

Buttercup. August 3rd. Very similar to Mikado, but slightly larger **Marigold.** August 8th. Yellow, semi-free, ripening at a time which is y desirable, filling a season where there has usually been a slight break.

Oriole. August 10th. Nearly free, yellow and starts to ripen just ahead of Golden Jubilee.

Carman. August 15th. Medium to large. White. Very hardy variety. Cumberland. August 15th. Practically free, white flesh, dark red color-elongated in shape, good size. Best white of its season.

Golden Jubilee. The most outstanding introduction of the New Jersey Experiment Station. A block laden with rich golden yellow, red blushed fruit is a handsome sight. Similar to Elberta in general appearance, but a brighter golden yellow, slightly smaller size and much better flavor.

Please write in the quantity, full name of variety, size or age and price Any necessary correspondence should be written on a separate sheet.

We do not substitute varieties in cases where an item is sold out unless requested to do so. If you wish a substitution, should we be unable to fill a portion of your order, write yes her......in which case we will give you the nearest we can under its proper label.
